## FIRE BLANKET

CE Standard: EN 1869:2019

**DISCARD AFTER USE.** Fire blanket made of 100% E-Glass fiberglass

Turn off the heat source under safe conditions. Pull the woven tapes to release the fire blanket out of its container.

Hold the woven tape, wrap the blanket forward on your hand, and protect yourself from the flame. Then, use the blanket as a heat shield, stay calm, aim at the target, and gently cover the burning material to extinguish the flame. Turn off the heat source and keep the fire blankets on until they cool down.

\*\*\*Don't try to uncover it before it has completely cooled\*\*\*

\*\*\*Protect your hand safety by wrapped the fire blanket before approaching the flame.

If a person's clothes catch on fire, wrap the blanket tightly around the person to smother the fire, let them fall to the ground, and roll until the fire is out. Leave the person wrapped in the fire blanket and call the emergency services immediately.

**WARNING!** \*\*\*Only fire blankets with a minimum size of 1.2 x 1.8 M are suitable for extinguishing clothing fires\*\*\*

Besides controlling the small fires, the fire blanket also limits the risk of electric shock in case of unintentional use of live electrical equipment.

**PULL TAPES TO RELEASE**

FIRE BLANKETS ARE REQUIRED TO BE INSPECTED ANNUALLY

1.2x1.2m

1.2x1.8m

1.8x1.8m
